### SUMMARY OF QUALIFICATIONS

- Full-stack software engineer with hands-on experience designing, building, and deploying web applications using Python, JavaScript, TypeScript, and modern frameworks.
- Proficient in RESTful API development with Flask and Node.js/Express, real-time communication via Socket.io, and NoSQL database design with MongoDB.
- Experienced in translating functional requirements into reliable, maintainable software through testing, debugging, and documentation.
- Proven ability to deliver production-ready solutions through academic, client-based, and personal full-stack projects.

### EDUCATION

Bachelor of Science in Computer Science; Minor: Mathematics; GPA: 3.3

December 2025

Washington State University, Pullman, WA

Relevant Coursework: Software Engineering, Operating Systems, Databases, Cybersecurity, Web Development

### RELEVANT SKILLS

- Languages: Python, C#, C/C++, JavaScript, TypeScript
- Web Technologies: HTML, CSS, React, Vite, Tailwind CSS
- Backend & APIs: RESTful APIs, Flask, Node.js, Express, Socket.io
- Databases: MongoDB, SQL, Relational Database Design
- Cloud & Deployment: Vercel, Railway, Cloudinary, EmailJS, Git-based workflows
- Tools & Practices: Git, Linux, Agile/Scrum, Debugging, Testing, Unity

### CERTIFICATIONS

- CompTIA A+ (In progress)
- Responsive Web Design Certification — [freeCodeCamp](https://www.freecodecamp.org/) (2026)

### PROJECTS / TECHNICAL EXPERIENCE

#### FamApp — Private Family Communication Platform

February 2026 – Present

[GitHub Repository](#)

- Built a full-stack family messaging app with a TypeScript/React frontend and Node.js/Express backend.
- Implemented real-time messaging via Socket.io, Google OAuth, Cloudinary uploads, and MongoDB.
- Deployed on Railway with automated health checks and restart-on-failure for production reliability.

#### AI Assistant

February 2026 – Present

[GitHub Repository](#)

- Built a multi-turn AI assistant using Groq's LLaMA models with a Flask REST API backend.
- Implemented file processing for images, PDFs, and 20+ code formats with MongoDB persistence.
- Delivered a multi-user API supporting file uploads and persistent conversation history.

#### Metal Whiskers Simulation

Jan 2025 – May 2025

[GitHub Repository](#)

- Developed a Unity/C# simulation modeling PCB failure via Monte Carlo analysis for a real client.
- Debugged crashes, improved UI, and established unit tests using Unity Test Runner across sprints.
- Delivered a tested simulation with documented results and progress updates to the client.

### VOLUNTEER EXPERIENCE

#### Voiland Peer Network Mentor / WSU-VCEA

Aug 2024 – May 2025

- Mentored first-year and transfer students, providing guidance and connecting them with campus resources.
- Developed strong communication, problem-solving, and leadership skills while supporting students.
